ABHI CHIMMILI

JAVA FULL STACK DEVELOPER

chimmiliabhi123@gmail.com | github.com/abhichimmili | linkedin.com/in/abhi-chimmil

Career Objective

Java Full Stack Developer with hands-on experience building React interfaces, integrating REST APIs, and developing database-backed applications. Skilled in Core Java, Spring Boot, Spring MVC, Servlets, JDBC, JPA/Hibernate, PostgreSQL, authentication and authorization, and API/unit testing. Experienced in collaborative project delivery, with an emphasis on maintainable code and reliable user-focused solutions.

Technical Skills

Programming: Java, JavaScript, SQL, PL/SQL, C, C++
Java Technologies:: Core Java (Java SE), OOP, Collections Framework, Java 8, Exception Handling, Multithreading, Design Patterns
Java Enterprise Technologies: JDBC, Servlets, JSP, J2EE, Spring Framework, Spring Boot, Spring MVC, Spring Security, JPA, Hibernate, REST APIs
Databases: MySQL, PostgreSQL, Firebase Realtime Database
Database Concepts: SQL Queries, CRUD Operations, Joins, Subqueries, PL/SQL Programming
Security & Testing: Spring Security, JWT, Authentication, Authorization, JUnit, Mockito, Swagger/OpenAPI, Postman
Frontend: React.js, Hooks, React Router, Zustand, Axios, HTML5, CSS3, Bootstrap, Tailwind CSS
Tools & Version Control: Git, GitHub, Maven, Eclipse, VS Code, Android Studio, pgAdmin 4, Flyway

Work Experience

Java Full Stack Trainee | VCUBE Institute *Jun 2026 – Dec 2026*

- Completed practical training in Core Java, OOP principles, JVM architecture, Collections Framework, Java 8 features, exception handling, multithreading, and design patterns.
- Practiced database programming by writing SQL queries, performing CRUD operations, and developing PL/SQL programs using procedural constructs.
- Implemented database connectivity and persistence using JDBC, JPA, Hibernate, and MySQL.
- Applied Spring Framework, Spring Boot, and Spring MVC concepts to develop structured Java applications using layered architecture.
- Learned input validation, global exception handling, authentication, authorization, and JWT-based security in Spring Boot applications.
- Used Postman and Swagger/OpenAPI to test REST APIs and document endpoints.
- Developed practice applications including Loan Management, Pet Care Management using JDBC/MySQL, Producer–Consumer, BookMyShow, Tic-Tac-Toe, and BrewMaster using HTML, CSS, and Bootstrap.

PERN Stack Developer | E-commerce Product *Startup, Feb 10 – Apr 10, 2026*

- Converted supplied Figma designs into reusable React components for e-commerce application screens.
- Developed Node.js/Express API endpoints, integrated frontend requests through Axios, and defined PostgreSQL schema using Prisma ORM.

Full Stack Developer Intern | Legal Aid Matching Platform *Dec 2025 – Jan 2026*
Infosys Springboard Virtual Internship

- Served as team lead, coordinated team collaboration, tracked task progress, and supported completion of milestones within deadlines.
- Developed React UI workflows with reusable components, Hooks, React Router, Zustand, Tailwind CSS, npm, and Axios for REST API integration.
- Implemented backend functionality with Java, Spring Boot, Spring Security, JWT authentication/authorization, and Controller–Service–Repository architecture.
- Integrated JPA-based persistence with PostgreSQL; used pgAdmin 4 and Flyway for database inspection and versioned migrations.
- Worked with WebSockets for real-time communication.
- Used Postman and Swagger/OpenAPI for API testing and documentation, and JUnit/Mockito for unit testing.

Projects

RideFlow | Ride-Sharing Application

- Designed Spring Boot REST APIs, JWT-based security, JPA entity relationships, and PostgreSQL/PostGIS integration.
- Designed ride-request and ride-lifecycle workflows, driver availability/assignment, and location-based driver matching using spatial queries.
- Incorporated route-optimization concepts using Dijkstra/A*, plus pagination/filtering, ride analytics, concurrency-safe driver assignment design.

AI Chat Assistant

- Built a Java/Spring Boot application integrating an AI model API through backend services.
- Designed an LLM/RAG-oriented response workflow with conversation history, prompt management, error handling, and a responsive chat interface.

Jira-Inspired Task Management System

- Developed a task-management web application using Advanced Java, Java Servlets, JSP, XML configuration, JDBC, and MySQL.
- Applied MVC separation for request handling, business logic, and presentation; implemented CRUD workflows to create, view, update, and delete task records.

Donate Nearby

- Developed an Android application using Java and Android Studio to support donation-related workflows.
- Integrated Firebase Realtime Database to store and manage donation-related information.
- Implemented Firebase Cloud Messaging (FCM) to support push notifications and improve communication with users.

Selected Java and Web POCs

- Built practice applications covering Loan Management, JDBC Pet Care Management, Producer–Consumer multithreading, BookMyShow, array-based Tic-Tac-Toe, and BrewMaster (HTML/CSS/Bootstrap).

Achievements

- Won second prize as a team in a hackathon.
- Led team coordination during the Infosys Springboard Legal Aid Matching Platform virtual internship and supported delivery against milestone deadlines.

Education

B.Tech | Electronics and Communication Engineering — RGUKT, Ongole 2022–2026
CGPA: 8.43/10

Pre-University Course | MPC — RGUKT, Ongole 2020–2022
CGPA: 9.62/10

Secondary School Certificate — A P Model School, Kondapuram 2015–2020
GPA: 10/10
